Mike Zimmer Director, Michigan Department of Licensing & Regulatory Affairs

The Brownfield Redevelopment Financing Act, 1996 PA 381, as amended, requires the Michigan Department of Environmental Quality (MDEQ) and the Michigan Strategic Fund (MSF) to submit a report annually to each member of the Legislature as provided in Section 16(4). Pursuant to this requirement, the Calendar Year 2013 Legislative Report was issued to the Michigan Legislature on November 3, 2014. Out of 294 Brownfield Redevelopment Authorities, 256 had completed reporting at that time, for a compliance rate of 87.1 percent.

On behalf of the MDEQ and the MSF, we are submitting to the Legislature the attached updated 2013 Legislative Report effective May 13, 2015. The report was amended to update the status of the data collection of numerous jurisdictions that were previously reported as delinquent. Out of 294 Brownfield Redevelopment Authorities, 293 have completed reporting, for a compliance rate of 99.3 percent.

If you have any questions, please contact Joel Freeman in the Office of Legislative Affairs, Michigan Economic Development Corporation, at 517-335-1847.

Attachment

The Brownfield Redevelopment Financing Act, 1996 PA 381, as amended (Act 381), requires the Michigan Department of Environmental Quality (MDEQ) and the Michigan Strategic Fund (MSF) to submit a report annually to each member of the Legislature as provided in Section 16(4). Pursuant to this requirement, the Calendar Year 2013 Legislative Report was issued to the Michigan Legislature on November 3, 2014. Out of 294 Brownfield Redevelopment Authorities, 256 had completed reporting at that time, for a compliance rate of 87.1 percent. A significant number of jurisdictions have reported since the November report was issued, and we are amending the report to provide the Legislature with the most up-to-date collected data. Out of 294 Brownfield Redevelopment Authorities, 293 have completed reporting, for a compliance rate of 99.3 percent. The remaining one Authority is still being pursued for data submission.

Act 381 authorizes municipalities to create Brownfield Redevelopment Authorities. These Authorities facilitate the implementation of Brownfield Plans (Plans) and promote revitalization of brownfield properties through the use of tax increment financing. A municipality may establish an Authority, which then develops and approves Plans. A Plan will identify properties on which specific eligible activities will be conducted that will result in the increase and capture of personal and property taxes. In most cases, properties are identified by the municipality in conjunction with a developer interested in redeveloping a property. The developer is repaid for the increased costs of investment on the property, due to mitigation of brownfield conditions, via the capture of the increased taxes. The jurisdiction continues to capture the predevelopment taxes until the increased costs are paid off.

A property eligible for brownfield development is either a "facility" [as defined in Part 201, Environmental Remediation, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA)] or "blighted," "functionally obsolete," or "historic" property, as defined in Act 381.

Approval from the MDEQ is required for all work plans for projects where taxes levied for school operating purposes will be captured to pay for environmental eligible activities. These eligible activities include baseline environmental assessments, due care activities, and additional response activities under the NREPA.

Approval from the MSF is required for all work plans for projects where taxes levied for school operating purposes will be captured to pay for non-environmental eligible activities, such as demolition, lead and asbestos abatement, site preparation, and infrastructure improvements that directly benefit the eligible property. Local jurisdictions may also approve the Plans that only utilize local taxes to reimburse eligible activity costs and forgo State tax capture for reimbursement ("local-only" Plans).

To enable legislators to easily identify projects within their respective districts, the data is being presented by county and the address of each brownfield project. The information is based on Plans and work plans in which tax increment revenues were collected in 2013 for both State school taxes and local-only taxes. This amended report provides an updated summary of

information that is self-reported from the jurisdiction, and the assumptions and statements are based solely on the submitted data.

A total of 182 Brownfield Redevelopment Authorities were compliant with reporting requirements but did not collect any Tax Increment Revenue (TIR). A total of 110 Brownfield Redevelopment Authorities had 396 Plans that are actively collecting TIR across the state. The total amount of TIR collected during 2013 from actively collecting Plans was \$21,161,723 for projects, creating a taxable value increase of \$256,835,652 at these designated sites for 2013.

Of the actively collecting Plans, 47 Plans included only environmental expenditures, 98 Plans included only non-environmental expenditures, 49 Plans included both environmental and non-environmental expenditures, and the remaining plans are a combination of the above, or were not properly identified due to errors in self-reported data. Local-only tax increment revenue was collected in 134 Plans.

The data is self-reported by each Brownfield Redevelopment Authority. A sample of 15 percent of those reported are in the process of having their data validated by a higher official of the jurisdiction.

Please see the attached spreadsheet for detailed reporting information.
