SUBJECT: 2014 Michigan Renaissance Zone Annual Report

Section 15 of Public Act 376 of 1996, the Michigan Renaissance Zone Act, requires an annual report be submitted to the legislature. Pursuant to this requirement, attached is the 2014 annual report.

If you have any questions regarding this report, please contact Joel Freeman in our Office of Government Affairs at 517.335.1847.

Attachment

Michigan Renaissance Zone Act 2014 Legislative Report

The Michigan Renaissance Zone Act (the “Act”), PA 376 of 1996, established the Michigan Renaissance Zone initiative to foster economic opportunities in the state; facilitate economic development; stimulate industrial, commercial and residential improvements; prevent physical and infrastructure deterioration of defined areas; and provide for the reuse of unproductive or abandoned industrial properties.

Most state and local taxes, including both real and personal property tax, are abated within Renaissance Zones for up to a maximum of 15 years, with the exception of one Alternative Energy Zone not to exceed 20 years. Michigan Business Tax liability is excused for company operations within a Renaissance Zone; however, Corporate Income Tax liability is not eligible for abatement under the program. Federal government taxes, local bond obligations, school sinking fund, or special assessments may still be due. Additionally, companies are not exempt from paying Michigan sales and use taxes. The tax benefits are phased out in 25% increments during the Zone’s final three years of existence.

The State of Michigan reimburses intermediate school districts, local school districts, community college districts, and public libraries for lost revenue where taxes are abated. There is no fiscal year 2014 appropriation for reimbursements unless a supplemental appropriation is approved. The State of Michigan does not replace the tax revenue lost to the local unit of government or county.

This report captures the progress and development of Renaissance Zones that were active during the 2014 calendar year. The report is divided by the eight major types of Renaissance Zones: (1) Agricultural Processing, (2) MSF-Designated, (3) Renewable Energy Facility, (4) Forest Products Processing, (5) Border Crossing Facility, (6) Next Michigan, (7) Tool and Die Recovery, and (8) Geographic. There are subsets within each of these major types which will be indicated within each section.

Official actions taken by the Michigan Strategic Fund (MSF) Board include granting new designations, amending existing ones, and revoking Renaissance Zones that are out of compliance. These actions are indicated in parentheses beside the name of the designated entity. Renaissance Zones that expired at the end of calendar year 2014 are indicated in the same method.

Projections of anticipated capital investment and job creation within a Renaissance Zone shown in the tables below were derived from the original application or development agreement. Projected information not enforced by a development agreement is footnoted by the Zone recipient name. Renaissance Zones not governed by development agreements were designated prior to this being required by statute or by policy. Reported Actual Investment and Reported Actual Job Creation, as reported by the Renaissance Zone, is an accumulation of information from the first year that benefits were received through December 31, 2014. Reported Actual Job Creation is calculated by subtracting the Reported Baseline Jobs at Zone Designation and Reported Jobs Transferred to Zone from Reported Current Jobs. Reported Jobs Transferred to Zone are jobs that have been transferred to the Zone from another facility or entity outside the Zone owned by the Renaissance Zone recipient company. Reported Jobs Transferred to Zone are not considered as net new jobs. The tables below also include the percent change in Taxable Value (TV) and State Equalized Value (SEV) since the Renaissance Zone designation, as reported to the Michigan Economic Development Corporation (MEDC).

Change in Adjusted Gross Income of Residents in Renaissance Zones (AGI)

Projects associated with Renaissance Zones are mainly focused on business development; however, some projects are aimed toward residential development, especially many older geographic Renaissance Zones. Individual residents living within a Renaissance Zone are eligible for certain individual benefits, including relief from property taxes and local income taxes. As required by statute, the percentage change of Adjusted Gross Income (AGI) of residents who claimed Renaissance Zone benefits is reported below based on records obtained from the Michigan Department of Treasury for the most recent complete years available – 2012 and 2013. This information is available by municipality of residence, rather than by Renaissance Zone.

Change in Adjusted Growth Income (AGI) for Residents of Renaissance Zones Between 2012 and 2013

Municipality of Residency	Percent Change in AGI
Benton Charter Township*	-48.3
City of Detroit*	21.9
City of Flint*	149.4
City of Grand Rapids*	24.2
City of Jackson	23.5
City of Kalamazoo	-27.0
City of Lansing	-13.9
City of Muskegon	42.1
City of Saginaw	12.5
City of Warren	65.3

*Figure is affected by subzones within the municipality's jurisdiction that expired at the conclusion of 2012, causing the figure to be diminished by the decreased number of eligible residents in the calculation for the subsequent year

Agricultural Processing Renaissance Zone Activity

Agricultural Processing Renaissance Zones are company-specific rather than geographically targeted, and are limited to companies in the business of agricultural processing. The Michigan Renaissance Zone Act originally allowed for the designation of five Agricultural Processing Renaissance Zones by the State Administrative Board. The Act was amended three times to increase the number of potential zone designations to a total of 30 Agricultural Processing Renaissance Zones.

As of December 31, 2014, the Michigan Strategic Fund (MSF) and the Michigan Commission of Agriculture & Rural Development (MCARD) have recommended designation of 27 of the 30 available zones to the State Administrative Board pursuant to Section 8c(1) of the Act. Eighteen Agricultural Processing Renaissance Zones were active during 2014.

The majority of the Agricultural Processing Renaissance Zones were designated when the statute required the execution of development agreements requiring annual reporting; however, those companies without a development agreement governing their Renaissance Zone were asked to voluntarily report.

These Renaissance Zones have reported creating 1,576 jobs and leveraging more than \$1.29 billion in private investment during the active periods of the zones. The following is the information on the status of all active Agricultural Processing Renaissance Zones.

Classification			Investment		Jobs						Tax Information		Materials	Benefits

Michigan Strategic Fund Designated Renaissance Zones

The MSF Board may designate Renaissance Zones anywhere in the state as long as the city, village, or township consents to the creation of a Renaissance Zone within its boundaries. MSF-Designated Renaissance Zones are company and project-specific, with one exception of a special kind of MSF-Designated Redevelopment Renaissance Zone awarded to the City of Greenville. MSF-Designated Renaissance Zones are mostly industry-neutral and decisions on which companies' projects shall receive the designation are made collaboratively with the local government, the company, state agencies, and approved by the MSF Board.

As of December 31, 2014, a total of 16 MSF-Designated Renaissance Zones have been awarded, 13 of which were active in 2014, including one expiring at the conclusion of 2014. There are 12 zones available for designation, two of which are required to be redevelopment zones and three must be in a rural area.

The majority of the MSF-Designated Renaissance Zones were designated when the statute required the execution of development agreements requiring annual reporting; however, those companies without a development agreement governing their Renaissance Zone were asked to voluntarily report.

These Renaissance Zones have reported creating 1,197 jobs and leveraging more than \$1.26 billion in private investment during the active periods of the zones. The following is the information on the status of all active MSF-Designated Renaissance Zones.

Classification				Investment		Jobs						Tax Information		Benefits

⁶ Company received additional state economic incentive(s)

⁷ Metrics not enforced by a Development Agreement

Renewable Energy Renaissance Zones

Renewable Energy Renaissance Zones are company-specific rather than geographically targeted, and are limited to companies in the business of renewable energy. The Michigan Renaissance Zone Act, as amended, authorizes the State Administrative Board to designate up to 15 Renewable Energy Renaissance Zones, upon recommendation by the MSF Board. Of the 15 zone designations, five must be used for renewable energy facilities engaged in the production of cellulosic biofuels.

As of December 31, 2014, nine zones had been designated with five in effect; three of the five designations satisfy the requirement for the production of cellulosic biofuels. There are currently seven zones available for designation, two of which must satisfy the requirement for the production of cellulosic biofuels.

These Renaissance Zones have reported creating 212 new jobs and leveraging more than \$442 million in private investment during the active periods of the zones. The following is the information on the status of all active Renewable Energy Renaissance Zones.

Classification			Investment		Jobs						Tax Information		Benefits
Company	Local Unit of Government	County	Projected Investment ¹	Reported Actual Investment	Projected Job Creation ¹	Reported Current Jobs ²	Reported Jobs Transferred to Zone ³	Reported Baseline Jobs at Designation ⁴	Reported Actual Job Creation ⁵	Reported Avg Weekly Wage of Jobs Created	% Change in Taxable Value (TV)	% Change in SEV	First Year Benefits Received

⁶ Company received additional state economic incentive(s)

Forest Products Processing Renaissance Zone

Forest Products Processing Renaissance Zones are company-specific rather than geographically targeted. Section 8(f) of the Michigan Renaissance Zone Act, as amended, allows for the designation of 10 Forest Products Processing Renaissance Zones by the State Administrative Board, upon recommendation of the MSF Board. As of December 31, 2014, one zone has been designated and is active in 2014, leaving nine additional Forest Products Processing Renaissance Zones available for designation.

The single Forest Products Processing Renaissance Zone reported retaining 437 jobs and leveraging \$49.6 million in private investment during the active period of the zone. The following is the information on the status of the active Forest Products Processing Renaissance Zone.

Classification			Investment		Jobs						Tax Information		Materials	Benefits

¹ Projected information is derived from original application or development agreement

² The number of jobs the company reported to have on December 31, 2014

³ Jobs transferred to the Zone from another facility or entity owned by the same company outside of the Zone

⁴ Information derived from original application or reported by the company in annual progress report

⁵ Reported Actual Job Creation/Retention is calculated by subtracting Reported Jobs Transferred to Zone and Reported Baseline Jobs at Zone Designation from Reported Current Jobs

⁶ Company received additional state economic incentive(s)

Border Crossing Facility Renaissance Zones

The Michigan Renaissance Zone Act, as amended, allows for the designation of up to 25 Border Crossing Facility Renaissance Zones in qualified border local governmental units, if the city or township or combination of cities and townships consented to the creation of a Renaissance Zone. As of December 31, 2014, no Border Crossing Facility Renaissance Zones have been designated.

Next Michigan Renaissance Zones

The Next Michigan Development Act, P.A. 275 of 2010, as amended, authorizes the MSF to designate up to seven Next Michigan Development Corporations, comprised of local government units that enter into an inter-local agreement to form a Corporation. These Next Michigan Development Corporations are empowered to recommend certification of a Next Michigan Renaissance Zone within their Next Michigan Development District, consisting of the boundaries of the component local government units. By the close of the 2014 calendar year, the following five Next Michigan Development Corporations have been approved, with a two additional designations pending, one in the Upper Peninsula and one in the City of Detroit.

1. **Port Lansing** comprised of the City of Lansing and a portion of Dewitt Township via a P.A. 425 Agreement.
2. **Detroit Region Aerotropolis** – VantagePort comprised of the City of Taylor, City of Romulus, City of Belleville, City of Ypsilanti, Township of Huron, Charter Township of Van Buren, and Charter Township of Ypsilanti; County of Washtenaw and County of Wayne.
3. **West Michigan Economic Partnership** comprised of the City of Grand Rapids, City of Kentwood, Charter Township of Cascade, City of Wyoming, and City of Muskegon; County of Muskegon and County of Kent.
4. **I-69 International Trade Corridor** comprised of the Township of Grand Blanc, Township of Mount Morris, Township of Mundy, City of Burton, City of Corunna, City of Durand, City of Fenton, City of Flint, City of Grand Blanc, City of Imlay City, City of Lapeer, City of Marysville, City of Owosso, City of Perry, City of St. Clair, Township of Attica, Township of Davison, Township of Flint, Township of Kimball, Township of Lapeer, Township of Perry, Township of St. Clair, Township of Vernon, Village of Almont, Village of Lennon, Village of Morrice, Village of North Branch, and Village of Vernon; County of St. Clair, County of Lapeer, County of Genesee and County of Shiawassee.
5. **Grand Traverse Region** – Northern Nexus comprised of the City of Traverse City, Charter Township of Garfield, Charter Township of East Bay, and Township of Blair; County of Grand Traverse.

Next Michigan Renaissance Zones are project-specific and must be associated with one or more Eligible Next Michigan Businesses, which are those companies engaged in multi-modal product shipment, such as logistics-based businesses. Next Michigan Development Corporations may submit an application on behalf of an Eligible Business to the MSF for certification of a proposed Renaissance Zone designation. Up to a total of 25 eligible businesses can be certified to receive benefits under the Act, but no more than ten businesses can be certified within any one Next Michigan Development Corporation district as qualified Eligible Next Michigan Businesses. Once an Eligible Next Michigan Business is certified, it may begin receiving Renaissance Zone benefits for the duration of the designation of up to 15 years. As of December 31, 2014, no Next Michigan Development Corporations have submitted applications on behalf of an Eligible Next Michigan Business to the MSF Board, and no Renaissance Zone certifications have taken place.

Tool & Die Recovery Renaissance Zones

The Michigan Renaissance Zone Act, as amended, allows the MSF Board to designate up to 35 Tool & Die Renaissance Recovery Zones (“Recovery Zones”) in the state, to be located in cities, townships, and villages that consented to the creation of a Tool & Die Recovery Zone within their boundaries. The Tool & Die Renaissance Recovery Zone Program was designed for the purpose of sustaining the tool and die industry in Michigan, not necessarily to stimulate economic growth. The structure differs from the rest of the overall Renaissance Zone Program in that each Recovery Zone is attached to a particular Collaborative of tool and die companies. Membership in one of these Collaboratives is required to become eligible to receive the benefits of that Collaborative’s Recovery Zone. Many Collaboratives represent tool and die companies in a particular geographic region of Michigan, while others have members across the state who receive Recovery Zone benefits.

Each Collaborative is governed by a qualified collaborative agreement between its members with the purpose of encouraging cooperation among tool and die companies to help strengthen them and retain existing jobs, as well as make them more competitive in the global marketplace. In addition to Collaborative membership, eligibility for a Tool & Die Recovery Zone requires that the parcel(s) of property designated must be leased or owned by a qualified tool and die business and be used primarily for tool and die business operations. Also, businesses must be classified with an appropriate North American Industrial Classification System (NAICS) code listed in the Act corresponding to the tool and die industry.

Companies with over 75 employees have the added requirement of entering into a written memorandum of understanding (MOU) with the MSF Board and local unit of government. The MOU does not impose job creation or capital investment requirements, contrasting with development agreements related to other types of Renaissance Zones. The vast majority of the tool and die companies do not have contractual reporting requirements. Most new Recovery Zone designations or amendments granted in the last several years were conditioned upon agreeing to annual reporting to the MEDC.

As of December 31, 2014, there were a total of 29 Collaboratives, each with their own Tool & Die Recovery Zone, consisting of approximately 277 companies in approximately 36 counties across the State, each receiving Renaissance Zone benefits. The Recovery Zones have reported creating 2,381 new jobs and leveraging more than \$446 million in private investment during the active periods of the zones.

The following information on the status of companies within a Tool & Die Recovery Renaissance Zone is separated into two categories. The first table contains information pertaining to companies that have reporting requirements. Projected information is available for many of these companies, even when reporting is not contractually required. The second table contains the majority of Tool & Die Recovery Renaissance Zone recipients, those companies without the obligation to annually report on their status.

¹ Metrics for all companies are not enforced by a Development Agreement

² Projected information is derived from original application or development agreement

³ The number of jobs the company reported to have on December 31, 2014

⁴ Jobs transferred to the Zone from another facility or entity owned by the same company outside of the Zone

⁵ Information derived from original application or reported by the company in annual progress report

⁶ Reported Actual Job Creation/Retention is calculated by subtracting Reported Jobs Transferred to Zone and Reported Baseline Jobs at Zone Designation from Reported Current Jobs

⁷ Company received additional state economic incentive(s)

Tool & Die Renaissance Recovery Zones

Geographic Renaissance Zone Activity

In 1996, the Michigan Renaissance Zone Act, under MCL 125.2684, authorized the designation of Renaissance Zones (“Geographic Renaissance Zones”) which allow any company or individual to locate within a Geographic Renaissance Zone and to receive benefits. In 2014, 19 of these zones were still active. Most of these Geographic Renaissance Zones are made up of a combination of two types of subzones: (1) community-specific geographic subzones and (2) company-specific geographic subzones. The first type of subzone - those enacted under the original language of the Act - was awarded to communities in areas targeted for development; these types of subzones are referred to as “community-specific subzones.” Within the 19 Geographic Renaissance Zones currently active, there are 101 community-specific subzones that span approximately 50 local communities across the state.

The Act was later amended to allow for creation of a second type of a subzone associated with one or more companies. These subzones were created either by designating new subzones within existing Geographic Renaissance Zones or by granting time extensions for portions of existing community-specific subzones to particular companies for specified projects. These types of subzones are referred to as “company-specific subzones.” Because these types of subzones are linked to particular companies, the benefits of the Renaissance Zone are controlled and defined. Legislative authority to designate geographic zones or subzones and allow time extensions expired on December 31, 2011.

Below are individual tables for each of the 19 active Geographic Renaissance Zones, indicating metrics for each of the component subzones within the Geographic Renaissance Zone. The K.I. Sawyer Renaissance Zone and the Warren Tank Plant Renaissance Zone are both designated as a military sub-type of Geographic Renaissance Zone; therefore, these two Renaissance Zones share a table.

Most of the company-specific subzones have development agreements governing the minimum amount of capital investment and job creation projected and imposes reporting requirements. For the community-specific subzones and those company-specific subzones where no development agreement exists, requests were made to obtain development information from the applicable local government or the company, respectively. However, without an enforcement mechanism, reporting to the MEDC is voluntary and may result in underreporting of activity within the zones. Communities report difficulty in tracking the businesses and residents moving into and out of the community-specific subzones.

These Geographic Renaissance Zones have reported creating 3,631 new jobs and leveraging more than \$1.5 billion in private investment during the active periods of the Zones. The following is the status of the active Geographic Renaissance Zones.

Berrien County/City of Benton Harbor/Benton Twp. Renaissance Zone
