

**Michigan Economic Development Corporation  
FY2024 Single Recipient Grants - Sec. 308**

**Economic Development Grants**

No.	Grant Title	Grant Recipient	Project Purpose	Location	Amount Allocated/Appropriated	Amount Disbursed as of 09/06/2024	Sponsor
1	Detroit Flood Prevention	Grandmont Rosedale Development Corporation	The Grand River Green Lot will establish a green infrastructure parking lot that will provide the community with parking, beautification and a mechanism to address flooding and storm water runoff. The project will also help reduce drainage costs for nearby businesses, reducing the cost of their water bills. Our project will include seven parking spaces, a gazebo and public seating as well as a rain garden that will capture runoff from nearby roofs.	Detroit	\$240,000.00	\$120,000.00	Sen. Cavanagh; Rep. Young; Rep. Pohutsky; Rep. Price
2	Invest Detroit Grant	Invest Detroit Foundation	Invest Detroit Foundation is a nonprofit, mission based lender that provides financial programming and investments to support redevelopment projects and small businesses in Detroit and startup companies throughout Michigan. Invest Detroit will us the grant to support the work of ID Ventures, our early-stage venture fund that invests in and provides programming to support Michigan startup companies. All of our programming includes a focus on underserved and BIPOC business owners and founders.	Detroit	\$500,000.00	\$250,000.00	Sen. Cavanagh
3	Vanguard Community Development	Vanguard Community Development Corporation	The North End Housing and Business Development project will reclaim a vacant building for productive use; thereby eliminating slum and blight. This project will enable Vanguard to expand our Small Business Development Center located as well as on our Community Campus The project will create a community development center, located at 2817 East Grand Boulevard, on Vanguard's Community Campus. This center will provide clean, safe indoor space for North End community members to gather and meet. Block clubs and other community groups will use this space for meetings. Vanguard will operate a computer teaching lab for senior citizens in the new community development center to enable them to participate with confidence in the digital world. It will also house Vanguard's Economic Development, Housing Development, and Community Engagement and Planning programs. These uses are consistent with the grant authorizing language in PA 119 of 2023. Specifically, Section 1006.3 authorizes "from funds appropriated in part 1 for economic development grants, the department shall allocate\$2,500,000.to a non-profit...to support a North End housing and business development project." This is the project referred to in the authorizing language.	Detroit	\$2,500,000.00	\$1,250,000.00	Rep. McFall
4	Adrian Workforce Development Center	Lenawee Community Foundation	On page 69 of the PA 199 of 2023: Under One Time Appropriations: "Adrian Workforce Development Center". On page 667 of the state budget allocation "(4) From the funds appropriated in part 1 for economic development grants, the department shall allocate \$10,000,000.00 to a nonprofit community foundation in a city with a population between 20,000 and 21,000 in a county with a population between 99,000 and 100,000 according to the most recent federal decennial census for a workforce development center."	Adrian	\$10,000,000.00	\$5,000,000.00	Sen. Bellino
5	Education System Study - MDE	Michigan Department of Education (MDE)	From the funds appropriated in part 1 for economic development grants, \$500,000.00 shall be provided to the department of education to enter into a contract with a research organization to study, analyze, and report suggested improvements regarding the efficacy and efficiency of educational governance in this state, including federal, state, intermediate school districts, local school districts, and public school academies.	Lansing	\$500,000.00	\$0.00	Sen. Bayer
6	Midtown Cultural Center Planning Initiative	Midtown Detroit, Inc.	Midtown Detroit Inc and its 11 stakeholder partners have developed a master plan for Detroit's cultural center district. State funding will be uses towards the first phase of the project which includes installing sustainable infrastructure, shared public parking deck and landscaping enhancements along the Fransworth corridor.	Detroit	\$12,000,000.00	\$6,000,000.00	Rep. McFall
7	Lee Plaza Detroit	Invest Detroit Foundation	The authorizing Grant language awarded the above amount "to a United States Treasury-certified community development financial institution ("CDFI") that supports real estate and business projects" .. "located in a city with a population greater than 600,000 according to the most recent federal decennial census to support a mixed use development that will include senior and workforce housing located in a city with a population greater than 600,000" Per the information provided, Invest Detroit Foundation located in Detroit, Michigan that provides gap financing for projects in the City, and the project in question, Lee Plaza is a proposed mixed use development located in Detroit that will include senior and workforce housing.	Detroit	\$6,000,000.00	\$3,000,000.00	Rep. T. Carter
8	Fisher Body Plant Redevelopment	Detroit Brownfield Redevelopment Authority	Assist with costs for the redevelopment of the Fisher Body 21 Plant into a mixed use residential and retail development.	Detroit	\$5,000,000.00	\$2,500,000.00	Rep. McFall
9	Lansing Center	Lansing Entertainment & Public Facilities Authority-Lansing Center	It's been more than 15 years since the Lansing Center has had any major upgrades. The \$5 million will go towards much needed upgrades for life safety equipment, information technology infrastructure, roofs repairs, safety and security equipment upgrades and food and beverage operations.	Lansing	\$5,000,000.00	\$2,500,000.00	Rep. Dievendorf
10	Marygrove Development	Marygrove Conservancy	The purpose of the project is to remodel the Florent Gillet residence hall on the campus of Marygrove Conservancy. As part of the remodel, the residence hall will be built to suit for a major tenant that will bring additional programming, jobs, and residents to the Northwest area of Detroit helping to spur Economic Development. This is consistent with the authorizing grant in PA 119 of 2023 as it was provided to the Conservancy as an Economic Development grant.	Detroit	\$10,000,000.00	\$10,000,000.00	Rep. Weiss; Sen. McMorrow
11	North American International Auto Show	Detroit Auto Dealers Association	To support and fund the North American International Auto Show-Detroit Auto Show in Detroit Michigan, Wayne County. Tech Days- These days highlight Michigan's leadership and economic development in automotive technology and future mobility/electrification for the world's media and potential employers in the automotive segment. Tech days also showcases the AutoMobil-D(AMD) which allows visitors to see innovative and future technologies ranging from inventive software and AI programs, to advanced charging stations, drone and the latest research and development from leading universities. Charity Preview- The show's signature charity fundraising gala which raises dollars for Detroit and Michigan's children charities. Public Days- Allows hundreds of thousands of visitors to experience what is new in automotive technology and mobility, brand-defining vehicles, product ride-and-drives and dynamic experiential activations.	Detroit	\$8,000,000.00	\$8,000,000.00	Rep. Snyder

No.	Grant Title	Grant Recipient	Project Purpose	Location	Amount Allocated/Appropriated	Amount Disbursed as of 09/06/2024	Sponsor
12	Redevelopment of Shopping Center - Sterling Heights	City of Sterling Heights	<p>Lakeside Mall opened 46 years ago in 1976. Developed by A. Alfred Taubman and Rodamco as one of the first regional indoor malls, Lakeside Mall remains one of the largest indoor malls in the state of Michigan consisting of over 1.5 million square feet of retail space. The mall expanded 14 years later adding a food court and other amenities. In 2007, the mall received a \$3 million refresh with new signage, landscaping and improved access.</p> <p>Over the past decade, retail shopping patterns shifted to more online purchasing and discount retailers assumed more market share causing big box anchors to downsize and/or close. The loss of big box anchors also compromised the viability of the smaller in-line stores in malls across the country and soon thereafter, hundreds of malls began closing.</p> <p>The City proactively responded to the changing dynamics of Lakeside Mall in 2015 and developed the Lakeside Sustainability Master Plan, with input from residents, businesses and other stakeholders. The plan has been instrumental in changing the course of history for Lakeside Mall by reimagining an exciting, transformative, and economically viable mixed use redevelopment of the Lakeside property.</p> <p>With this exciting plan in mind, Lionheart Capital, a Miami-based diversified investment firm focused on value growth, purchased the mall through Lakeside OOTB Ventures, LLC and has been working collaboratively with the City to bring the Lakeside Sustainability Master Plan to life. After more than three years of conceptual design work and negotiations, the plan submitted herein will result in the largest private mixed use investment in Macomb County history. The mixed-use town center concept will reposition the Lakeside area as a focal and destination point for future generations for not only Sterling Heights residents, but for the entire region. The Lakeside development will once again become an economic engine and hub for the City providing much needed revenue streams to preserve the City's financial viability for the next 50 years and beyond.</p> <p>A \$1 Billion Investment – Lakeside Town Center Lionheart Capital is committing \$1 billion to this mega redevelopment consisting of soft costs such as architectural design, engineering, financing and interest costs, and over \$600 million in hard costs to construct the Lakeside Town Center. This transformative project will consist of:</p> <ul style="list-style-type: none"> <li>• 2,803 residential units (urban/loft multi-family style)</li> <li>• New Retail Space – 149,920 square feet</li> <li>• Covered, heated pedestrian shopping</li> <li>• Main Street oriented sidewalks</li> <li>• Macys and JC Penney facelift</li> <li>• Hotel – 120 rooms/attached parking deck</li> <li>• Office Space – 60,000 square feet</li> <li>• Restaurants</li> <li>• City Center oriented parking – on street and parking deck</li> <li>• Recreational Amenities – open space, trail connectivity, lyrical loop, Central Park and multiple pocket parks (10 acres total)</li> </ul>	Sterling Heights	\$3,000,000.00	\$1,500,000.00	Rep. Shannon; Sen. Wojno
13	National Guard Conference	Detroit Metro Convention and Visitors Bureau	This \$2,000,000 special grant will be issued to the Detroit Convention & Visitors Bureau for use in conducting two national annual conferences in the City of Detroit, a city of over 600,000 citizens, in August 2024. The two conferences represent two associations of the National Guard Association of the United States whose nearly 7,000 members from across the 54 states and territories, will travel to the city of Detroit from 17 - 26 August 2024. These attendees will lodge at seven hotels along the People Mover route, consume meals, receive professional development and exhibition hall at the Huntington Place Convention Center. They will experience social events at a variety of historic venues throughout the city. These conferences provide an economic impact to the City of Detroit, Detroit Metro Airport, and the surrounding areas. More importantly, it provides an opportunity to show the attendees and exhibitors the presence, value, and opportunities available in the Arsenal of Democracy, defense, industry, automotive industry and tourism in Pure Michigan.	Detroit	\$2,000,000.00	\$2,000,000.00	Rep. Snyder
14	Most Worshipful Prince Hall Grand Lodge of Free and Accepted Masons of Michigan Building Renovations	Most Worshipful Prince Hall Grand Lodge of Michigan	Renovations of the building: As a revitalization and community development program, as outlined in Section 1006 of House Bill 4437	Detroit	\$1,500,000.00	\$750,000.00	Rep. Wilson, Jr.
<b>Total:</b>					<b>\$66,240,000.00</b>	<b>\$42,870,000.00</b>	

**Michigan Economic Development Corporation  
FY2024 Single Recipient Grants - Sec. 308**

**Public Infrastructure Grants**

No.	Grant Title	Grant Recipient	Project Purpose	Location	Amount Allocated/Appropriated	Amount Disbursed as of 09/06/2024	Sponsor
1	Reappropriated				(\$500,000.00)		Sen. Geiss
2	City of Pontiac	City of Pontiac	The City of Pontiac has a population between 61,000 and 62,000 according to the most recent federal decennial census and this appropriation is meant to support a downtown initiative surrounding the Phoenix Center. The appropriation is meant to extinguish the City's debt related to the original purchase of the Phoenix Center that occurred while the City of Pontiac was in distress. This appropriation will relieve the City of Pontiac of legacy debt related to the Phoenix Center.	Pontiac	\$5,000,000.00	\$5,000,000.00	Sen. Moss; Rep. B. Carter
3	Midland Water Infrastructure	City of Midland	The project's intent is to mitigate the risks of river and stormwater flooding in order to positively impact the health and safety of local residents.	Midland	\$15,000,000.00	\$7,500,000.00	Sen. McDonald Rivet; Rep. Schuette
4	Huntington Woods Safe Streets Grant	City of Huntington Woods	The public purpose of this project is to install a traffic light at approximately Scotia Rd and 11 Mile Rd in order to better facilitate the deployment of emergency vehicles out of the Huntington Woods Public Safety station. In addition, the presence of a traffic light at this location will allow schoolchildren and other pedestrians to cross 11 Mile Road in a safer manner. There is currently no crosswalk between Coolidge Hwy and Woodward Ave.	Huntington Woods	\$100,000.00	\$50,000.00	Rep. Weiss; Sen. McMorrow
5	North Rosedale Community House	North Rosedale Park Civic Association	The North Rosedale Community House is a community hub for members of the North Rosedale and Grandmont Rosedale neighborhoods. The funds will be used to improve the playground on the grounds, repair the parking lot and sidewalks, and building maintenance and repairs.	Detroit	\$1,100,000.00	\$1,100,000.00	Sen. Cavanagh; Rep. Young; Rep. Pohutsky; Rep. Price
6	Clinton County, Dewitt Road Projects	Clinton County Road Commission	The Clinton County Road Commission will lead the reconstruction of the DeWitt Road corridor in Clinton County, in partnership with local municipalities. The purpose of the project is to create an All Season truck route connecting M-21 to US-127 around the City of St Johns, along with expanding and improving the county primary road system connecting to both M-21 and US-127.	Clinton County	\$3,500,000.00	\$1,750,000.00	Sen. Singh
7	Alpena Port Expansion	City of Alpena	The City of Alpena is partnering with Holcim (US) Inc. d/b/a Holcim Alpena to modernize Holcim Alpena's Port and landside facilities to cost-effectively meet the increasing demand for Holcim Alpena's vital products. The upgrades and improvements to the Holcim Alpena Port include: Improvement dredging to deepen harbor and channel, demolition of the central pier, and installation of in-water dolphins. This will allow increased vessel access.	Alpena	\$1,900,000.00	\$950,000.00	Sen. Hoytenga
8	Barryton Village Dam Repairs	Village of Barryton	Barryton Dam is aging and in need of improvements for ensuring public safety and preventing environmental damage.	Barryton	\$700,000.00	\$350,000.00	Sen. Hauck
9	Grand Haven Environment Mitigation	City of Grand Haven	Harbor Island is located in Grand Haven, Michigan, prominently in the center of the Grand River as it flows into Lake Michigan. Over the previous 100 years the island has served a variety of industrial purposes, all of which have compounded and created the environmental concern it is today. Harbor Island has been subject to the environmental impacts of decades of using dredged materials as fill, as well as the operation of a municipal landfill and a coal-fired power plant. Upon closure of the J.B. Sims power generating plant in early 2020 and undertaking of appropriate compliance measures to vacate the site, monitoring wells were installed to gauge the extent of the contamination. To date, high levels of co-mingled contaminants including PFAS and Coal Combustion Residual (CCR) materials have been discovered. The City of Grand Haven retained HDR, a nationally-recognized environmental consultant, to complete a holistic review of the site and prepare environmental remediation alternatives. This funding will assist the City in addressing the on-site contamination.	Grand Haven	\$2,500,000.00	\$1,250,000.00	Sen. Victory
10	Paw Paw Water Dam	Village of Paw Paw	Dam repair. The Briggs dam which is located in the Village of Paw Paw is well over 100 years old and is a structure that controls the south branch of the Paw Paw River as it enters into Maple Lake which was created at that time. In 2017, a portion of the Dam breached which was then repaired. Since that time, another portion of the dam (the auxiliary spillway) is badly in need of repair and replacement due to age and its deteriorating condition. An engineering firm has been retained to design, assist in permitting and to oversee construction to replace the auxiliary spillway as well as additional improvements required to meet a 500 year flood event. These repairs are necessary to prevent a second dam failure. This project will prevent flood damage to commercial and residential properties, help control water levels to the Paw Paw river, mitigate flooding downstream outside the Village limits preserve Maple Lake, maintain recreational use and protect public from a flood event. The Village plans to complete the project the winter of 2024-2025.	Paw Paw	\$1,100,000.00	\$550,000.00	Sen. Nesbitt
11	Lansing Community Pool	City of Lansing	Funds will be used to renovate Moores Park Pool. A historic community pool built by Wesley Bintz, former Lansing City Engineer who constructed over 100 pools across the country less than 10 of which are still in operation. Please note that there is another \$5m grant associated with this project in the DNR budget.	Lansing	\$1,200,000.00	\$600,000.00	Sen. Anthony
12	Keego Harbor Water Infrastructure	City of Keego Harbor	For the public's safety Marine Patrol on Cass Lake, within the boundaries of Keego Harbor, Oakland County Michigan.	Keego Harbor	\$100,000.00	\$50,000.00	Sen. Bayer

No.	Grant Title	Grant Recipient	Project Purpose	Location	Amount Allocated/Appropriated	Amount Disbursed as of 09/06/2024	Sponsor
13	Grand Rapids - MLK Community Lodge	City of Grand Rapids	<p>The Martin Luther King (MLK) Park Lodge project will work to create additional recreation opportunities, strengthen the community, and improve the health of residents in the Southeast neighborhood of Grand Rapids. MLK Park is a community park that serves more than 23,500 residents, which includes a large portion of minority residents (45%). The park's service area also includes four federally-designated Opportunity Zones (tracts 30, 32, 35, 36); four HUD Qualified Census Tracts (31, 32, 35, 36); and three DOT Historically Disinvested Communities (31, 32, 36). The park resides in the third ward of Grand Rapids on the southeast side of the city.</p> <p>The MLK Park Lodge project aims to address historic disinvestment that parks in the third ward of Grand Rapids have experienced. Throughout the United States racial and ethnic minority groups experienced higher proportions of COVID-19 related hospitalizations. Black populations also experience more underlying health conditions than other groups in the United States, which increases the risk of severe illness from COVID-19. The census tracts in Kent County with the highest proportion of Black residents are all in the MLK Park neighborhood. MLK Park has been a gathering space for Black residents and community members since its establishment in the early 20th century, this places great importance on the investment into this project which will increase the positive impact and amenities available to its surrounding community. The MLK Park Lodge project will address the growing needs of the community through the social and physical determinates of health by increasing the availability of community-based resources, increasing access to recreation and leisure activities, increasing accessibility, and improving the aesthetics of the park.</p> <p>The MLK Park Lodge was designed with community input and addresses needs as identified by local stakeholders. The new lodge facility will provide residents with an indoor gym, rentable event space, and indoor fitness class space. Additionally, the lodge will host the King Park Neighborhood Association and the Our Community's Children, a City of Grand Rapids initiative which provides young people in grand rapids opportunities and programming to support their college, career, personal, and professional development. The pool locker rooms, which are currently located in the basement of the lodge, will also be relocated and reconstructed in this project and include improved accessibility and gender-neutral space to accommodate the popular outdoor pool located south of the lodge.</p> <p>Center of Disease Control and Prevention. (2021). Trends in racial and ethnic disparities in COVID-19 hospitalizations, by region – United States, March-December 2020. <a href="https://www.cdc.gov/mmwr/volumes/70/wr/mm7015e2.htm#:~:text=Analysis%20of%20hospitalizations%20from%20a,related%20hospitalization%20compared%20with%20White">https://www.cdc.gov/mmwr/volumes/70/wr/mm7015e2.htm#:~:text=Analysis%20of%20hospitalizations%20from%20a,related%20hospitalization%20compared%20with%20White</a></p> <p>Grand Rapids African American Health Institute. Grant; SML Brinks
14	Southgate - Downriver Community Resiliency	Downriver Community Conference	The DCC Regional Resilience Hub expands our ability to connect with member communities and the public, as well as bring furthered workforce and economic development services to the Downriver region.	Southgate	\$2,000,000.00	\$2,000,000.00	Sen. Camilleri
15	Redford Twp. - Handy Park Improvements	Charter Township of Redford	Redford Township will be utilizing funding for local Park improvements to improve the Health and Wellness of our Township residents. Including renovation of current equipment and amenities and new additions that will continue to promote healthy lifestyles for our Township residents and neighboring communities.	Redford Township	\$750,000.00	\$375,000.00	Sen. Cavanagh; Rep. Young; Rep. Pohutsky
16	Farmington - Warner Mansion	City of Farmington	The City of Farmington proposes restoration of the Warner Mansion, carriage house, and green space. This former home of Governor Fred Warner is a historical treasure in the City of Farmington. Residents and visitors, alike, enjoy partaking in tours of the home as well as the many events that take place within it and on the grounds. Events include the annual Tree Lighting Ceremony, Ghost Night at the Mansion, tea parties, porch concerts, as well as personal rentals for weddings and/or photographs. However, with any older structure, it takes a lot of funding to repair and preserve it. The City would like to remake it to its former glory for future generations to enjoy and learn the significance of the home in the City of Farmington and State of Michigan's history. This project meets the requirements set forth in the grant.	Farmington	\$1,000,000.00	\$500,000.00	Sen. Cavanagh; Sen. Bayer; Rep. Steckloff; Rep. Hoskins
17	Jefferson Chalmers Flooding	City of Detroit, General Services Department	<p>In October of 2021 the Jefferson-Chalmers Neighborhood, in the City of Detroit, was designated a floodplain by the Federal Emergency Management Agency (FEMA).</p> <p>The Jefferson-Chalmers Neighborhood is bounded by E. Jefferson Avenue to the north, Alter Road to the east, the Detroit River to the south, and Conner Creek to the west. Along with life safety impacts of overland flooding during rain events, high Great Lakes water levels, and infrastructure failure the floodplain designation also restricts Federal funding for the area and requires homeowners to pay for flood insurance.</p> <p>The purpose of this project is to assist with flood prevention and community engagement in the Jefferson-Chalmers neighborhood. Jefferson-Chalmers is a neighborhood in Detroit that is repeatedly affected by flooding due to infrastructure issues and the close proximity to the Detroit River and canals running through the neighborhood. Funding for flooding protection will assist with community engagement in the neighborhood to develop solutions and/or potentially assisting homeowners with seawall repairs. There is an ongoing effort to try and remove the neighborhood from the FEMA floodplain map.</p> <p>A detailed study looking at the feasibility of getting out of the floodplain is required, which includes the following:</p> <ul style="list-style-type: none"> <li>Agency Consulting &amp; Meetings</li> <li>NEPA Environmental Assessments</li> <li>Canal Sediment Sampling</li> <li>Geotechnical Boring Services</li> <li>Environmental Soil Evaluation</li> <li>Summary Report</li> </ul>	Detroit	\$1,000,000.00	\$0.00	Sen. Chang
18	Taylor Heritage Park	City of Taylor	The Heritage Park Petting Farm is looking to expand on its grounds by adding a pavilion and playground to the existing farm area. The pavilion would serve as additional party rental space on the weekends, an educational space for school tours and group trips, a family space for regular patrons, and additional space to host special events. The pavilion would double as hay storage in the lofted area and make hay storage and accessibility exceptionally easier. In addition, the farm is looking to add a playground to its grounds to promote outside play and provide a variety of	Taylor	\$500,000.00	\$250,000.00	Sen. Geiss
19	Reappropriated				(\$1,000,000.00)		Sen. Geiss

**Michigan Economic Development Corporation  
FY2024 Single Recipient Grants - Sec. 308**

No.	Grant Title	Grant Recipient	Project Purpose	Location	Amount Allocated/Appropriated	Amount Disbursed as of 09/06/2024	Sponsor
20	Harsens Island Water Infrastructure	Clay Township	To build a wastewater Treatment Plant on Harsens Island to service the Sans Souci area. This plant uses Algae to treat the water. The biproduct of the process is algae that will be sold and recycled into ink or other products. This project will be an economic boost to the Sans Souci area that is being hindered by poor septic systems. It will also improve the water quality and environment of the St Clair River.	Clay Township	\$2,000,000.00	\$1,000,000.00	Sen. Hertel
21	Lansing Riverfront	Capital Region Community Foundation	From the funds appropriated in part 1 for public infrastructure grants, the department shall allocate \$1,700,000 to a nonprofit in a city with a population between 106,000 and 108,000 in a county with a population between 280,000 and 290,000 according to the most recent federal decennial census for construction of a riverfront musical performance venue.	Lansing	\$1,700,000.00	\$850,000.00	Sen. Anthony
22	Oakland County - Pontiac Downtown Project	Oakland County	From the \$50,000,000.00 funds appropriated in part 1 for public infrastructure grants, Oakland County will utilize the funds for following, which includes but is not limited to, improvements to county operations, property acquisition, building renovations, blight removal, redevelopment of commercial and green spaces, road construction, streetscaping, placemaking, and development of safe parking options for county and state workers and residents.	Oakland County	\$50,000,000.00	\$25,000,000.00	Sen. Moss; Rep. B. Carter
23	Jackson Community Action Agency Weatherization	Community Action Agency	Homeowner rehab in Jackson serving primarily low income homeowners. Rehabilitation funds for repair/replacement of roofs, HVAC, windows and other related items that address health and safety. Removal of barriers to rehab as needed.	Jackson	\$500,000.00	\$250,000.00	Sen. Shink
24	Village of Brooklyn Park Infrastructure	Village of Brooklyn	The public purpose of the project is to increase the recreation accessibility of trails and playgrounds, create a Wheel Chair Friendly park, and intentionally form a vibrant future for Swain Park for everyone in our community to enjoy. Our local Brooklyn Kiwanis Club is in the process of raising \$175,000 to upgrade and replace the current outdated playground equipment with inclusive and accessible play options. The focus for this funding is that Swain Park itself is not ADA compliant and does not allow access to the new Kiwanis playground equipment or other areas of the Park. This funding will be utilized to create the needed accessible pathways and surfaces in the park to ensure that we are working toward developing a community were all are welcome to come and utilize are park system.	Brooklyn	\$250,000.00	\$125,000.00	Sen. Shink
25	Village of Grass Lake Pedestrian Crossing	Village of Grass Lake	This project proposes improving a gap in the existing public sidewalk on the west-side of S Lake Street in the Village of Grass Lake, Jackson County. The existing sidewalk currently ends approximately 25' on both the north-side and south-side of an existing Amtrak rail line (railroad owned by the Michigan Department of Transportation). The improvements will increase safety and convenience of pedestrians, create ADA compliant crossings, and improve the safety of bicyclist through filling the gap by installing an at-grade rail crossing.	Grass Lake	\$300,000.00	\$150,000.00	Sen. Shink
26	Centerline Parks and Recreation Infrastructure	City of Centerline	The City of Center Line will be using the appropriated funds to make Improvements to Memorial Park including Memorial Field improvements.	Centerline	\$1,250,000.00	\$625,000.00	Sen. Wojno; Rep. McKinney
27	Shelby Township Parks	Shelby Township	Shelby Township Park recreation facility. Paving, earth moving, tree planting and recreational fencing for sports fields	Shelby Township	\$780,000.00	\$780,000.00	Sen. Bumstead
28	Benzie County Emergency Tower Improvements	Benzie County	This project is a fundamental enhancement to the current 800 MHz radio communications system that covers Benzie County. All police and fire agencies working in Benzie County subscribe to the MPSCS 800 MHz radio system, which connects a majority of first responders in the State of Michigan. Because of its beautiful topography, Benzie County has areas of emergency radio communication deficiencies which limit the quality of emergency radio coverage for first responders. One of the areas, with the highest concern, is the area around the City of Frankfort, encompassing the Village of Elberta, the west end of Crystal Lake, and along the Lake Michigan shoreline. The most evident reason for this location to be prioritized over others is because of its size and its population of both residents and visitors to the area. Furthermore, the City of Frankfort also has an established Fire Department that supplies the fire coverage of four neighboring townships. This location has been a Benzie County priority to enhance emergency radio communications.	Benzie County	\$2,200,000.00	\$1,100,000.00	Rep. Coffia
29	Yale Public Schools Street Crossing	Yale Public Schools in St. Clair County	To provide safe crossing between Yale School District Facilities, in Yale, MI located in St. Clair County. After a pedestrian/vehicle accident a few years ago the School District is requesting help with an upgraded safety crossing at the Yale Rd/Park Ave and School Dr Intersection. It is the St. Clair County Road Commission's recommendation that a HAWK (High-intensity Activated Crosswalk Beacon) be installed for pedestrian use across Yale Road near the intersections of Park Drive and School Drive. As part of the project, pedestrian facilities (i.e. sidewalks, sidewalk ramps, curb cutouts, etc.) will need to be upgraded to current ADA standards, as well as the installation of the traffic signal.	Yale	\$300,000.00	\$150,000.00	Sen. Lauwers
30	Grand Rapids Children's Museum	The Grand Rapids Children's Museum	The Grand Rapids Children's Museum is partnering with the Grand Rapids Public Library and the City of Grand Rapids to build a world class STEAM Lab. The building will be a cultural hub and destination for our community and those visiting our city, to spend hours in a learning and joyful environment.	Grand Rapids	\$5,000,000.00	\$250,000.00	Rep. Glanville; Sen. Huizenga

**Michigan Economic Development Corporation  
FY2024 Single Recipient Grants - Sec. 308**

No.	Grant Title	Grant Recipient	Project Purpose	Location	Amount Allocated/Appropriated	Amount Disbursed as of 09/06/2024	Sponsor
31	Garden City Hospital flooding	Garden City Hospital	<p>I. Overview Garden City Hospital is collaborating with the City of Dearborn Heights to assist with a flood mitigation project, to mitigate stormwater flooding occurrences around the Hospital, in addition to adjacent neighborhoods in Garden City, which borders the City of Dearborn Heights among other cities in the area. In June of 2021, a major flood severely impacted our southeast Michigan region and caused extensive flood damage to the City of Garden City, along with other communities in the area. In addition, Garden City Hospital experienced extensive damage to its entire Hospital ground level that necessitated a complete gutting and rebuilding of that floor, which currently remains unusable and under construction. Over 1.2 million gallons of water reaching up to 4 feet destroyed an entire floor, along with its expensive medical equipment, with damages estimated at \$150 million. This water was drawn in from the surrounding Garden City neighborhoods, as the sloped Hospital grounds inherently served as a detention area, thus absorbing the bulk of the destructive water from the community.</p> <p>Garden City Hospital is embedded within a neighborhood in the community. GCH has a separate stand-alone building along the front entrance of the Hospital. This building is located along Inkster Road in Garden City and borders the City of Dearborn Heights (directly across the street). Garden City Hospital is willing to provide this space as the location for this much needed infrastructure project. The location and size of this building makes it an ideal space for the installation of a detention basin, along with an opportunity for an environmentally friendly greenspace/rain garden. This will serve to detain storm runoff during wet weather and to release the water back into adjacent storm conveyance systems in both cities, thereby addressing flood damage due to storm system capacity. This would help protect the Hospital and the neighboring community, while serving as an environmentally friendly green space in Garden City.</p> <p>II. Impact The Hospital's property is situated at a slope which creates a funnel for stormwater to enter the property and building, in addition to the neighboring community. With the current climate change predictions, flood incidents are predicted to occur more frequently. Garden City Hospital, which is Garden City's largest employer, will unfortunately not survive another occurrence, without this flood mitigation project. The primary populations which the Hospital services include residents from Garden City, Westland, Inkster, Livonia, Redford, Dearborn Heights, and Canton.</p> <p>III. Outcome The proposed work consists of the design and construction of a detention basin to accommodate storm water during wet weather and discharge back into existing storm conveyance systems, thereby preventing a repeat of flood damage experienced around the Hospital and neighboring community.</p> <p>Existing storm systems in the City of Garden City and its neighboring cities currently lack the needed capacity to accommodate repeated wet weather events with higher rainfall volume. This project represents the most economical and effective option to address this issue. Other potential benefits to this project include enticing developments in adjacent areas currently constrained by flood issues.</p>	Garden City	\$5,000,000.00	\$250,000.00	Rep. Polehanki
32	Pleasant Ridge Water Infrastructure	City of Pleasant Ridge	The funding will be used to replace public water main and lead service lines, and to complete sewer maintenance and repair. The purpose of the grant will be to protect and ensure the public health, safety and welfare by replacing 100-year old undersized water main, by eliminating lead from the water system, and ensuring that public sewers remain in good working order.	Pleasant Ridge	\$1,800,000.00	\$900,000.00	Rep. Scott; Sen. McMorro
33	Broadway Ave. - Muskegon Heights	City of Muskegon Heights	1019 Public Infrastructure. The City of Muskegon Heights will reconstruct 1.78 miles of Broadway Avenue from Glade Street to Getty Street which is vital to stimulate economic development bringing business and jobs to the downtown area. Improve traffic flow along the east/west arterial in the city.	Muskegon Heights	\$6,000,000.00	\$3,000,000.00	Rep. Snyder
34	City of Wyoming Infrastructure Project	City of Wyoming	This award is for a public infrastructure project in Wyoming, Michigan which has a population of 76,510. Wyoming is located in Kent County, whose population is 657,984.	Wyoming	\$20,000,000.00	\$10,000,000.00	SML Brinks; Rep. Fitzgerald
35	John Ball Zoo	John Ball Zoo	The public purpose of John Ball Zoo's \$14 million grant from the State of Michigan is to support the African Expansion in Zoo's Master Plan. Specifically, the funds will be directed towards infrastructure projects, including the development of new pathways, buildings, and habitats within the Zoo's Africa expansion project. By utilizing the state grant for essential infrastructure projects, the Zoo can effectively position itself to engage donors in funding exciting and charismatic habitats, such as giraffes. Donors are often more inclined to support these exciting and iconic animal additions when they see that their contributions are going towards enhancing the overall Zoo experience, including improved infrastructure. Giraffes and other captivating animals are known to draw larger crowds to Zoos. By successfully securing donations for these habitats, the Zoo can anticipate increased attendance, which, in turn, has a positive economic impact on the local community. Greater visitor numbers mean increased revenue from admission fees, memberships, concessions, and related tourism spending, benefiting the economy.	Grand Rapids	\$14,000,000.00	\$7,000,000.00	Reps Gianville, Skaggs, Fitzgerald, Hood and Grant
36	Lake St. Clair Metropark Marina Renovations	Huron-Clinton Metropolitan Authority	The purpose of the Lake St. Clair Metropark North Marina Redevelopment Project is to renovate Lake St. Clair Metropark's North Marina to better serve the public by providing a family-friendly, accessible marina that boaters and park patrons can enjoy for generations. This marina renovation will also serve the Great Lakes region by helping to retain jobs in the marine, fishing, and event industries. The marina also serves an important reporting location of U.S. Customs and Border Patrol welcoming visitors across the Great Lakes from Canada. The renovation will provide an all-encompassing community asset, which is forward thinking in its approach to increasing and varying water levels, accessibility, and use of the space as a community venue and gathering space.	Harrison Township	\$5,000,000.00	\$2,500,000.00	Rep. Mentzer; Sen. Hertel

**Michigan Economic Development Corporation  
FY2024 Single Recipient Grants - Sec. 308**

No.	Grant Title	Grant Recipient	Project Purpose	Location	Amount Allocated/Appropriated	Amount Disbursed as of 09/06/2024	Sponsor
37	Jackson County Bridge Repair	Jackson County Department of Transportation	This project will provide funding to reconstruct two bridges and rehabilitate a third bridge. These three bridges are on moderate volume roadways and are currently load restricted or closed causing a hardship to all that travel the roadways Jackson County. This project will construct bridges that will not have load restrictions allowing more efficient movement through the county.	Jackson County	\$4,000,000.00	\$2,000,000.00	Rep. Lightner, Sen Shink
38	Linden Mills Restoration	City of Linden	Restoration and redevelopment of the Linden Mill	Linden	\$4,000,000.00	\$2,000,000.00	Rep. Mueller
39	Southfield Local Road Repair	City of Southfield	The purpose of the project is to complete heavy pavement rehabilitation to North Park Drive and Rutland Avenue, both public major roads under the jurisdiction of the City of Southfield in Oakland County.	Southfield	\$4,000,000.00	\$2,000,000.00	Rep. Hoskins; Sen. Moss
40	Cascade Charter Township Urban/Suburban Recreational Pathway Interlink Project	Cascade Charter Township	Connect new and existing trail infrastructure in Cascade Charter Township, including but not limited, trail connection on Burton St SE to the City of Kentwood limits with a pedestrian structure across Interstate 96. Other trail connections are to be determined with the goal of complete multi mobility.	Cascade Charter Township	\$3,500,000.00	\$1,750,000.00	Rep. Skaggs
41	Detroit Zoo Infrastructure	Detroit Zoological Society	Detroit Zoological Society (DZS) requested State funding to support urgent water infrastructure improvements at the Detroit Zoo's 95-year-old main campus. The DZS is a critical asset for our state, driving recreation and tourism with nearly 1.2 million visitors and \$168 million in economic impact expected this year alone. For nearly a century, the DZS also has provided extensive educational programming to thousands of Michigan school children while connecting all DZS members, guests and program participants with the natural world and wildlife conservation strategies. The DZS needs this investment to replace aging infrastructure for stormwater, sanitary and municipal water supplies. The DZS has conducted extensive analysis exposing undersized and antiquated infrastructure that poses a significant risk to structures and animal habitats.	Detroit	\$3,000,000.00	\$3,000,000.00	Rep. Scott; Sen. McMorrow; Rep. Weiss
42	Texas Township Flooding Infrastructure Project	Charter Township of Texas	This public project will address flooding issues that have negatively damaged our community. At the peak of flooding, water levels exceeded forty-three inches resulting in homes needing to be razed and hundreds of properties left with extensive and costly repairs. This project will help stabilize lake levels and provide much relief to our residents.	Texas Township	\$2,200,000.00	\$2,200,000.00	Rep. Morse
43	Muskegon Airport Roof Replacement	Muskegon County	Renovate and replace the existing roof and skylights on the Muskegon County Airport passenger terminal building. Built in 1994, this public infrastructure upgrade will extend the service life of the existing facility for many years to come. Additionally, the modernization effort to replace the aging "greenhouse" style skylights will further reduce heating and cooling requirements, and cut electric and natural gas energy usage by an estimated 20%.	Muskegon County	\$1,900,000.00	\$800,000.00	Rep. Snyder
44	Hackley Administration Building Preservation - Muskegon	Michigan Department of Labor and Economic Opportunity	The historic Hackley building has been publicly owned by the local school district for over a century. The high cost of maintaining the structure over the past 100 years has resulted in significant deferred maintenance that has ultimately jeopardized the entire building. This building is an iconic centerpiece of the downtown, and really needs to be saved and restored. The funds will be used to repair and secure the failing roof and truss system and restore a three-story sandstone wall that is in process of collapse. The community will benefit in several ways, including historic and cultural preservation, blight elimination, and the opportunity for the city to consider absorbing the structure into public ownership and direct public use as a city facility.	Muskegon	\$1,000,000.00	\$0.00	Rep. Snyder
45	Inclusive Playground - Clinton Charter Township	Charter Township of Clinton	The purpose is to create an outdoor recreation area inclusive of a playground, therapeutic fitness area, and sensory area on the Civic Center grounds. This will allow play regardless of age, race, or abilities, improving the cognitive, physical, social, and emotional well-being of all people. Through play, everyone can learn about the world and themselves. They will also learn life skills such as: confidence, empathy, decision-making, sharing and helping. By equipping people of all ages and abilities with inclusive environments and the skills to play together independently, people will feel nurtured, encouraged, respected, and active during play - both physically and socially - thereby creating a sense of community among all people.	Clinton Township	\$1,000,000.00	\$500,000.00	Rep. Mentzer; Rep. Klinefelt
46	Utica - Pioneer Park Pavilion and Pedestrian Bridge	City of Utica	The City of Utica will use the funds appropriated in PA 119 of 2023 to replace the Davis Street Pedestrian Bridge and construct a new pavilion at Pioneer Park. The Davis Street Pedestrian Bridge is a vital component of the non-motorized transportation network of the City of Utica and Macomb County, as well as the Iron-Belle Trail, connecting the neighborhoods on either side of M-59 (Hall Road) and the neighboring communities of Sterling Heights and Shelby Township. The Pioneer Park is a dog park constructed with an enhancement grant from the State of Michigan and utilized by residents of Utica and its neighboring communities of Sterling Heights, Shelby Township, Macomb Township, and Rochester Hills.	Utica	\$1,000,000.00	\$500,000.00	Rep. Shannon
47	Sterling Heights Recreational Grant	City of Sterling Heights	These funds will be used toward the purchase of land to be converted to a public park. This purchase will be focused in the southeast quadrant of our City. Many residents in this quadrant do not have convenient access to a city park from their home. Several parcels are currently under consideration. The primary use of the funding will be for land acquisition, however any funds left after purchase, will be used for park improvements, including, but not limited to landscaping, trail construction, and the purchase of playground equipment.	Sterling Heights	\$1,000,000.00	\$500,000.00	Rep. Shannon; Sen. Wojno
48	Troy Cricket Field	City of Troy	City of Troy residents continue to express their strong desire for a regulation size cricket field with associated amenities. The City of Troy has a large and growing population of Indian decent in which Cricket is an important part of their culture. Funding for this project will be used to construct the field and the associated amenities at Boulan Park.	Troy	\$900,000.00	\$450,000.00	Rep. MacDonell

**Michigan Economic Development Corporation  
FY2024 Single Recipient Grants - Sec. 308**

No.	Grant Title	Grant Recipient	Project Purpose	Location	Amount Allocated/Appropriated	Amount Disbursed as of 09/06/2024	Sponsor
49	Genesee County Dam Gate Repairs	Genesee County Road Commission	The purpose is to rehabilitate the gate operating mechanisms on the Argentine Dam.	Genesee County	\$750,000.00	\$375,000.00	Rep. Mueller
50	Royal Oak Parking Structure	City of Royal Oak	The City of Royal Oak, as part of its Transportation System Management plans, has identified operational deficiencies at several of its parking structures. Considered transportation infrastructure, the parking garages are part of individuals' multi-modal trips: the communal infrastructure where people switch modes of transportation from driving to walking. While the City's initial project submittal did not specifically include maintenance to the elevator at the Center Street structure, emergency costly repairs have become an urgent and necessary element of this funding project. This facility is a lit, 24/7 access 500 spot, 6-story parking structure that directly services half of the visitors to, and employees of businesses in the downtown area, including Baker College. Royal Oak is an inclusive community with a culture that welcomes and services everyone – which includes equitable access to public and commercial places. It is unsafe, inconvenient, and sometimes not possible to require users to utilize stairs or to walk across the structure to access alternate means to get to their destination. This is especially true in consideration of meeting the needs of an aging population or those with mobility challenges. Other elements of the project include joint sealing and traffic coating for safety, electrical upgrades to improve energy efficiencies, and doors and windows/pedestrian entrance enhancements. Royal Oak businesses want their employees and customers to have safe and convenient access to the goods and services they offer. The parking structures in their current state are not promoting a livable community and pose challenges with safety and security. It should be noted that these project renovations and improvements address multiple objectives identified in Royal Oak's Sustainability and Climate Action Plan, Aging in Place Plan and Economic Development Plan.	Royal Oak	\$600,000.00	\$300,000.00	Sen. McMorrow; Rep. Scott
51		City of Grand Rapids	The purpose of the project is to preserve the heritage and promote the usage of Sullivan (Valley) Field, updating and renovating this historical park originally built in 1937. We intend to create a year-round community space for the surrounding neighborhoods and all of Grand Rapids. We will strive to create a joyful and safe space keeping with the inclusive history of Valley Field. We will work closely with the City of Grand Rapids to rebuild, expand and maintain this community gem. We seek to restore the park to its former grandeur while making it the premier community gathering space in our city.	Grand Rapids	\$1,050,000.00	\$525,000.00	Rep. Glanville; Rep. Grant; Rep. Hood
52	Willow Beach Road - Keego Harbor	City of Keego Harbor	The purpose of the project is to repair and replace portions of a bridge that are deteriorating to maintain the health, safety and welfare of City residents, provide connectivity to residents across the City and maintain the sanctity of Dollar Lake.	Keego Harbor	\$500,000.00	\$250,000.00	Rep. Arbit
53	River Rouge Infrastructure and Environmental Cleanup	City of River Rouge	Per the request of the City of River Rouge ("City"), Integrated Environmental, Inc. ("Integrated") has developed an estimate of the cost to remediate and restore the Great Lakes Athletic Fields (GLAFs) which has been determined to have soil contamination present in excess of the Natural Resources and Environmental Protection Act, P.A. 452 of 1994, as amended (NREPA), risk-based screening levels deemed protective of human health and the environment. 1.0 DISCOVERY OF CONTAMINATION By way of background, soil samples collected at the GLAFs by Integrated and the U.S. EPA, show the presence of metals including lead at concentrations which exceed the respective Generic Residential Cleanup Criteria pursuant to Part 201, Environmental Remediation of NREPA. The initial samples were collected by Integrated on behalf of the City to establish baseline values in response to the planned demolition of the nearby DTE Coal-Fired Power Plant. These initial findings were subsequently verified by additional sampling and testing conducted by the U.S. EPA. The aforementioned verification of the presence of metals contamination resulted in the construction of fencing to restrict access and cessation of organized sporting events by the community including the Public Schools at the GLAFs. An aerial photograph of the GLAFs is attached for your reference. 2.0 REMEDIATION AND RESTORATION The remediation of the GLAFs consists of the following essential operative elements described below: verification of the extent of the contaminated soils; remediation and verification of effectiveness including engineering design for proper drainage and related infrastructure; and restoration of the parks for unfettered use by the community including the public schools. 3.0 VERIFICATION OF THE EXTENT OF CONTAMINATION Based on the above-noted sampling and testing (see Section 1.0) the lateral and vertical extent of metals contamination at the GLAFs have been preliminarily estimated to encompass an area of 2.5 acres, to a depth of about 1.5 feet below ground surface. As such, prior to remediation of the contaminated soils, additional sampling and testing will be necessary to derive a final lateral and vertical extent of contaminated soil requiring remediation (i.e., removal and off-site disposal at a licensed landfill). The cost for this additional sampling and testing is estimated to be about \$20,000.00 4.0 REMEDIATION BY EXCAVATION FOLLOWED BY RESTORATION Following verification of the lateral and vertical extent of the soil contamination at the GLAFs, the impacted soils will be excavated and disposed of at a licensed Type II landfill assuming that sample analytical testing demonstrates that the contaminated soils do not constitute a hazardous waste as defined by Part 111, Hazardous Waste Management of NREPA. Prior to backfilling and subject to proper engineering design, the subterranean drainage infrastructure will be constructed to assure proper functioning of the fields for athletic and related uses. Similarly, the final grading will be conducted pursuant to the aforementioned and related engineering specifications. The imported fill soils will be sampled and analyzed to verify the absence of contamination. The fill soils will be suitably compacted and seeded per applicable construction codes for recreational use. The estimated cost of the aforementioned engineering design, sampling and testing, removal of contaminated soils, and restoration using imported clean fill followed by proper seeding is \$750,000. 5.0 COST ESTIMATE The total estimated cost for the remediation and restoration of the GLAFs is approximately \$770,000. The aforementioned scope and associated costs are estimated based on the information noted herein and are therefore subject to change based on the results of additional sampling and testing, engineering design, materials and contractor quotes at the time of implementation of the remedial action, and other factors. We appreciate having the opportunity to provide the City with this cost estimate in an effort to have the use of the GLAFs returned to the citizens for their enjoyment and added sense of community.	River Rouge	\$500,000.00	\$250,000.00	Rep. T. Carter

**Michigan Economic Development Corporation  
FY2024 Single Recipient Grants - Sec. 308**

No.	Grant Title	Grant Recipient	Project Purpose	Location	Amount Allocated/Appropriated	Amount Disbursed as of 09/06/2024	Sponsor
54	Lincoln Charter Township Sidewalks and Paths	Lincoln Charter Township	The project is an extension of existing walkways that were placed on both sides of W. John Beers Rd. in 2012 using a CMAQ (Congestion Mitigation Air Quality) grant along with Township local match. The work includes installation of 6' wide concrete paths, ADA ramps, some curbing, and drainage improvements. The addition of sidewalks will encourage pedestrians and cyclists to make trips between the Village and Township Parks, the public library, Lakeshore Public Schools, and the commercial area of John Beers Rd. and Cleveland Ave. The construction project closes a critical 2,700 ft. gap between Lincoln Township and the Village of Stevensville. Currently, pedestrians and cyclists must share the 4' widened shoulders which are not wide enough for safe travel by either type of user on this route, posted at 40 mph. This is particularly true in the winter months when the full width of the shoulders may be filled with snow.	Lincoln Charter Township	\$400,000.00	\$200,000.00	Rep. Andrews
55	Dimondale Village Hall	Village of Dimondale	The purpose of this project for the purchase of property by the Village of Dimondale for use under Village Administration.	Dimondale	\$750,000.00	\$375,000.00	Rep. Witwer; Sen. Anthony
56	Glassman Park Disc Golf Course - New Buffalo	New Buffalo Township	Glassman Park is a 47 acre woody, undeveloped park by the Galien River. The park has ADA access to the river, but limited access to its natural features. New Buffalo Township would like to preserve the natural habitat at the park as much as possible, but still offer an outdoor recreation option to the community. After discussing options, the Township decided that a disc golf course would be a good use of the space. The sport is very popular and it would attract a lot of users to the site. It supports individual and family play at all levels. The infrastructure is very minimal and would require clearing out some smaller trees to create holes for the course. The rustic nature of the layout would add challenge for players. The Township wants to include an area in the flattest area near parking for holes that could be a 2-3 hole family/newcomer play type area. It would also offer an option for people who don't want to commit to a large trek around the park or have mobility limits. The final proposed course would offer 18 holes of golf, but the first 2-3 will be accessible. Disc golf courses provide a unique and low-impact way for visitors to experience the local environment while enjoying a popular sport. Disc golf is great for families and amateurs alike: the whole family can take a meandering walk through nature, or a visitor could opt for a solo round. This incredibly unique amenity supports the existing population and can act as a tourism draw to the area. There are no disc golf courses in Harbor Country and the closest courses are in Lake Charter and Bertrand Townships, so this course would fill a gap in existing recreation options. Additionally, few outdoor activities exist for middle and high school aged children. Once they are beyond playground activity, they can struggle to recreate outdoors without joining organized sport leagues that sometimes come with significant expenses. A free option that offers fun to the beginner, novice or skilled player will be well-used by middle school and high school aged groups. There is abundant wildlife in the Glassman Park area, including a pair of bald eagles that live along the Galien River. Playing in the natural environment found at Glassman Park can pique interest in tree species, local birds, fish species in the Galien River and create future environmental stewards of the planet. There is no restroom at the park currently, so the project would add a restroom building that would also store township equipment and provide heated space for staff tasks if needed. Two unisex restrooms would be available and the building would have an overhang area for shade, picnic tables, trash and recycle bins. The disc golf course could also provide cross country skiing opportunities in the winter, expanding its use year round. The estimated cost to develop this project is \$452,400.	New Buffalo Township	\$200,000.00	\$100,000.00	Rep. Andrews
57	Harper Woods Pocket Park	City of Harper Woods	This project provides for the development of a new neighborhood pocket park on 2 adjoining, vacant City owned residential lots. The proposed park would have playground facilities for all ages, a walking path. This portion of the City is underserved in terms of recreational amenities and will be a great benefit to families with small. The park will also be entirely fenced in (low wrought-iron fencing across the front) which will provide a safe, closed space for young children to play and enhanced landscaping provided. In addition, pedestrian facilities at the intersection of Roscommon and Duprey would be improved to meet current ADA compliance and a median to provide for a safer environment for all ages to access this park.	Harper Woods	\$200,000.00	\$100,000.00	Sen. Hertel; Rep. Paiz
58	Plymouth - Kellogg Park Bandshell Replacement	City of Plymouth	By replacing our ageing bandshell with a new one, it allows the City of Plymouth the opportunity to continue its positive impact on our community. By providing free concerts and events, it brings people together. Creating social bonds and unity. It also has a positive impact on our tourism and economic growth.	Plymouth	\$200,000.00	\$100,000.00	Rep. Koleszar
59	St. Joseph - Shoreline Softening Coastal Management	City of St. Joseph	The authorizing language in PA 119 of 2023 is Article 9, FY 2023-24 Department of Labor and Economic Opportunity Budget, Sec.1019 Public Infrastructure Grants, item #59: "St. Joseph - Shoreline Softening Coastal Management 200,000". The public purpose of the project is to investigate shoreline softening methods that could be used as a practical, effective, and more environmentally sustainable alternative to hardened structures such as revetments, riprap, and seawalls on Michigan's Great Lakes coastlines. This effort will explore the feasibility of nature-based alternatives to hardened shoreline armoring strategies, including beach nourishment using materials currently lost from the natural littoral drift system and redirecting natural littoral drift patterns to restore and protect the Great Lakes' shorelines and enhance public access. The study area is one-mile length of Lake Michigan Shoreline immediately south of the St. Joseph Harbor Entry, with the goal of the plan to develop a strategy to soften the existing shoreline currently composed of armor stone and a mix of steel sheet pile walls and stub groins that impair natural habitat, littoral drift processes, and safe public access. This effort will determine the feasibility of these strategies that have been proven elsewhere in the Great Lakes and our oceanic coastlines here in Michigan, including the development of clear protocols for permitting and further testing of these strategies.	St. Joseph	\$200,000.00	\$100,000.00	Rep. Andrews
60	Novi Parks Splash Pad	City of Novi Parks, Recreation & Cultural Services	In September 2021, the City of Novi was approached by the family of Jessica Starr-Rose with a proposal to build a splashpad in her memory. Jessica Starr-Rose was a meteorologist at FOX 2 Detroit who died of suicide in 2018 following complications from surgery. She was a Novi resident and her husband Dan and two children still live in the City. To honor her and carry on her legacy the Starr-Rose family, with the help of the Novi Parks Foundation, has undertaken a fundraising campaign to assist with construction costs. Novi City Council has set a goal to "Construct and open a world-class splash pad at Bosco Fields". The Bosco Fields property was selected as the ideal location for the Splashpad due to it's central location in the city and proximity to the ITC Trail. The location provides soccer fields, walking paths, parking for visitors, a restroom for athletic field users, and high visibility for public safety and park patrols.	Novi	\$200,000.00	\$200,000.00	Rep. Breen

**Michigan Economic Development Corporation  
FY2024 Single Recipient Grants - Sec. 308**

No.	Grant Title	Grant Recipient	Project Purpose	Location	Amount Allocated/Appropriated	Amount Disbursed as of 09/06/2024	Sponsor
61	Hazel Park Library Meeting Pods	Hazel Park District Library	To build 3 learning/study/meeting pods in Hazel Park Library to be used for quiet study, meetings, podcasts, vlogs, and tutoring.	Hazel Park	\$100,000.00	\$50,000.00	Rep. McFall
62	Reappropriated				(\$80,000.00)		Rep. Koleszar
63	Sand Lake Water Infrastructure	Village of Sand Lake	Purpose of the project: The Village performed an evaluation of its stormwater system assets several years ago and discovered that storm sewer on E. Lake Street is failing, to the point of large holes in the pipe risking sinkholes at the surface. The asphalt pavement is severely deteriorated to the extent that maintenance activities are no longer effective. The proposed project includes replacement of the storm sewer in the area and resurfacing the asphalt pavement, addressing much-needed infrastructure improvements for this higher traffic corridor in the Village.	Sand Lake	\$410,000.00	\$205,000.00	Sen. Outman
64	Gratiot County Road Repairs	Michigan Department of Transportation	Interchange Improvement in Gratiot County (127 Interchange/Washington Road in Ithaca) to support truck traffic from new \$130 million soybean plant.	Gratiot County	\$5,000,000.00	\$0.00	Sen. Hauck
65	Greektown Corridor Development	Greektown Neighborhood Partnership	The Greektown Corridor Development project will renovate the corridor through the Greektown Detroit neighborhood from Randolph Street to the I-375 Service Drive. The renewed corridor will prioritize pedestrians, increase safety, provide maximum program flexibility, and celebrate the rich cultural and historic heritage of Greektown.	Detroit	\$20,000,000.00	\$10,000,000.00	Rep. Snyder
66	Burma Center Parking Capital Improvements - Battle Creek	Burmese American Initiative Inc. (DBA: Burma Center)	The Gathering Place is vibrant and thriving. However, the building, built in 1956, requires critical infrastructure updates. The state fund will be used for parking upgrade and roof. Parking Lot: Drisenga & Associates Inc. Completed a geotechnical evaluation report and recommendations for the parking lot renovations. The report indicated that all areas of the parking lot should require full depth reconstruction with new pavement and stormwater management features. Roof Renovation: A structurally sound and weather-resistant roof was not only essential for its own sustainability but also to prevent displacement and protect the building's overall infrastructure. The Gathering Place, a vital community hub, had weathered years of wear and tear, with the roof bearing the brunt of adverse weather conditions. The pandemic's lessons emphasized the urgency of addressing this vulnerability to ensure a resilient future. The roof renovation project is a critical step in fortifying the Gathering Place against potential disruptions. A compromised roof not only exposes occupants to the elements but also poses the risk of extensive water damage, affecting the building's structural integrity. The potential consequences of neglecting the roof issue would be dire, leading to discomfort, displacement, and costly repairs.	Battle Creek	\$750,000.00	\$375,000.00	Rep. Haadsma
67	Economic Development Site Readiness Project - 5 Mile Road - Wayne County	Michigan International Technology Corridor Redevelopment Authority (MITCRA)	To reconstruct and widen Five Mile Road, generally between Beck and Ridge Roads, including adjacent portions of Ridge Rd, to be a three-lane Class 'A' Roadway. This infrastructure improvement will support continued development of this 800-acre corridor into an innovative technology hub for the region to support continued growth in technology, research, and light industrial uses. The total appropriation amount will support roadway infrastructure, construction engineering efforts, as well as staff administration, legal and financial support.	Wayne County	\$10,000,000.00	\$5,000,000.00	Rep. Koleszar
68	City of Portland Wastewater Treatment Repairs	City of Portland	The City of Portland's Wastewater Systems Improvement Project (the "Project") began construction in Spring of 2023. The Project's scope of work initially included improvements to the wastewater treatment facilities, as well as the collection system. Unfortunately, due rising costs and supply chain issues, the collection system repairs and some wastewater treatment plant work had to be removed from the Project in order to not exceed the City's bond ceiling of 13 million dollars. The delayed repairs are critical to protect the public health and the environment. The areas selected for repair were based on the proximity to the rivers and the severity of the defects. Cracks and other structural defects in the pipe allow clean water to infiltrate the system that can overwhelm the treatment plant and potentially cause an overflow of untreated or partially treated wastewater, which was the case during the 2019 Ice Jam and State of Emergency. Notably, the City's river crossing under the Grand River was evaluated several years ago and found to have defects that must be addressed. The river crossing carries wastewater from a large portion of the City and poses a significant risk to the environment.	Portland	\$3,000,000.00	\$1,500,000.00	Rep. Johnsen
69	Ann Arbor Parks Splash Pads	City of Ann Arbor	This project of a new, universal access splash pad to celebrate our connection to water as part of Ann Arbor's Bicentennial Celebration. Southeast Area Park is uniquely positioned to enhance the quality of life for underserved communities, and provide a bridge between those communities and additional city services and amenities. As an universal access amenity, this will increase equity and inclusion in our parks.	Ann Arbor	\$1,000,000.00	\$500,000.00	Sen. Irwin; Rep. Rheingans; Rep. Morgan; Rep. Brabec; Rep. Conlin
Total:					\$234,420,000.00	\$115,410,000.00	

**Michigan Economic Development Corporation  
FY2024 Single Recipient Grants - Sec. 308**
